

PRE5003 Touch Activated Three-Stage Thermostat with Infra-Red Program Setup

Key features.

- ➔ Rating (at 250v AC) 16a heating load.
- ➔ Temperature Range – Set-back level 1-20°C
- ➔ Boost level 15-30°C & Frost protection 1- 20°C (Settable with PRE5900)
- ➔ User adjustment facility (between “set-back” & “comfort” only ~ max / min settings on knob)
- ➔ Temperature accuracy: +/- 0.5°C
- ➔ Timing range: 5mins – 480 mins (Set back) & time to frost
- ➔ 1-72 Hours (Settable with PRE5900)
- ➔ Lvd and Emc Compliant
- ➔ Remote Programming by “IR” handset - PRE5900

This ‘top of the range’ Touch activated thermostat offers the optimum in convenient control and features the same automatic triple-temperature sensor as the popular PRE5004.

The PRE5003 offers the facility of user adjustment by a rotary knob on the fascia, enabling residents to raise or lower temperatures within carefully set limits so that everyone retains control over their personal heating levels. Designed to give accurate control of room heating, each thermostat optimises energy usage whilst maintaining temperatures automatically. Most convenient of all, the PRE5003 boasts the latest in secure time / temperature programming through a simple to use “IR” handset, allowing rapid re-programming of program settings without removing the unit from the wall. This unique feature makes the PRE5003 the most flexible control available anywhere.

Ideally suited to controlling panel heaters or wet radiators in student residences, hotels, and holiday homes, the PRE5003 offers three temperature levels – ‘set-back’ maintains an economical

background heat; a higher boosted (comfort) temperature is available at the touch of a button, if no activation is detected for 48 hours, the temperature is allowed to fall to a 5°C “frost protection” setting to protect against condensation and unsightly mould growth. A further touch re-activates the unit.

Prefect Controls specialise in the automatic control of heating, lighting, and ventilation systems. We offer simple, energy efficient solutions which will save money on heating and lighting in new buildings and in existing properties. Why pay higher gas and electricity bills than you need to? **Call us to see how we could help you to cut your energy costs by up to 50%**
